

## Enabling Apostolic Globalization

By

Bruce A. Howell

At the 2008 Executive Global Council, Rev. Leroy Francis preached an outstanding message entitled "Enabling Apostolic Globalization." That is an excellent theme for the various summits we hold. Each deals with a different language group (Spanish, French, and Chinese) or world religion outreach and targets four areas for consideration: evangelism, training, Internet/radio, and literature. We recently concluded the Spanish Summit. Rev. D. Crossley ([dcrossley@upci.org](mailto:dcrossley@upci.org)) created an extensive database of all our Spanish literature using a great computer program. We are planning to use this approach for thousands of multi-language literature and media resources available through Foreign Missions ([lshirley@upci.org](mailto:lshirley@upci.org)). A website for Spanish readers has been developed through the coordination of Rev. J. Hopkins (<http://www.ipui.net>). The Global Association of Theological Studies ([gats@upci.org](mailto:gats@upci.org)) has various Spanish resources posted on their site (<http://www.gatsonline.org>). A replica site in Spanish is now planned (<http://www.AGETonlinea.org>). GATS has a CD of Spanish evangelism and training resources available. Spanish is the third most used language of the Internet (Chinese ranks number one). Over one million Spanish speakers utilize the Internet on a regular basis. Exciting reports concerning radio evangelism were also given. In one area twelve new churches were established as a direct result. This scenario is repeated for each language and world religion outreach summit held. The Chinese Summit revealed forty-eight trips were made into China in the past twelve months, encouraging each team to Adopt-a-City. A web radio station in Chinese, a web site, prayer walks and extensive plans for evangelism at the World Expo in Shanghai in 2010 are all in the planning

stages. Each summit is designed with one purpose in mind: enabling apostolic globalization. Coming together, we leave, better equipped to reach our world.
